PRO-Craft's Free iTero Scanner promotion allows dental practices to embrace the benefits of the digital world by saving time, money, and peace of mind with digital impressions.

MURRIETA, Calif., April 3, 2023 /PRNewswire-PRWeb/ -- **PRO-Craft Dental Laboratory** is excited to announce that they are now offering a free intraoral scanner to qualifying dental practices. With this offer, practices will be able to save money, produce quicker scans, receive faster restorations, and cut out the tediousness of the standard impression-taking process, all while improving the patient experience.

"The dental world is becoming closer and closer to being fully digitized," said founder and CDT Greg Schubert. "Our goal is to keep practices ahead of the curve. An intraoral scanner provides access to many benefits of the digital world, including faster impression-taking, faster turnaround time, and quicker shipping. Practices that work with us win in two ways—they receive access to a free intraoral scanner and work with our quality lab that has been family owned and operated for 44 years."

Our goal is to keep practices ahead of the curve. Practices that work with us win in two ways—they receive access to a free intraoral scanner and work with our quality lab that has been family owned and operated for 44 years.

An intraoral scanning tool allows practices to take digital impressions and send them to the lab in minutes, saving time and unnecessary paperwork. Altogether, this process helps practices save on impression material, remakes, chair time, and labor costs. Digital impressions also mean less patient discomfort and allow patients to engage more in their treatment plans.

PRO-Craft sets itself apart from just any dental laboratory by providing personalized service to every client and maintaining careful attention to detail in all their work. When clients contact PRO-Craft, they are connected with the lab's actual technical advisor, not just someone at a call center. Meanwhile, all restorations are hand-crafted and adjusted to each patient's needs. PRO-Craft never outsources any work to other dental labs and carefully creates all restorations in their Marietta facility.

PRO-Craft Dental laboratory specializes in high esthetic anterior and complex implant restorations. They are also a full-service lab offering a wide range of removable products, from premium hand-characterized dentures to EMA snore appliances.
